

## Coding Assignment Questions on Day-3 Content

### 1. Create an HTML page with the following requirements:

- A main heading (<h1>) with the text "Welcome to Full Stack Development."
- A subheading (<h2>) titled "Introduction to HTML Headings."
- A paragraph under each heading explaining the purpose of headings and paragraphs in HTML.

### 2. Write an HTML page styled with Inline CSS to:

- Create a paragraph (<p>) with text styled in red and font size of 20px.
- Add a heading (<h3>) with blue text and underline styling.

### 3. Design a webpage using Internal CSS that includes:

- A section with a heading (<h1>), subheading (<h2>), and two paragraphs.
- Style the paragraphs with green text, Arial font, and justify the alignment.

### 4. Create an HTML and CSS combination to demonstrate the Box Model:

- Include a <div> with:
  - width: 300px
  - padding: 20px
  - border: 2px solid black
  - margin: 30px
- Add content inside the <div> that reads "This demonstrates the Box Model."

### 5. Develop an HTML page linked to an External CSS file with the following:

- An external CSS file (styles.css) to:
  - Set the background color to lightblue.
  - Style the <h1> heading with a font size of 36px and color darkblue.
  - Style all <p> elements with font size 18px and color green.
- Link the CSS file to the HTML page and verify the styling.
